

GREEN PEEL®

Success stories

Preface

When Christine Schrammek developed the GREEN PEEL® herbal peeling treatment in 1958, her goal was to help people with blemished skin regain clear, beautiful skin and enhance their well-being.

Today - 65 years later - the dermatologically developed original GREEN PEEL® herbal peeling treatment is still one of the most successful natural methods for skin regeneration in more than 70 countries.

The further development of this unique method enables individualized application – from the GREEN PEEL® lifestyle treatment with a glow effect to intensive solutions for demanding skin concerns.

The GREEN PEEL® herbal peeling treatment is successful because it can be used regardless of gender, age, skin type, or skin concern and achieves unique, long-lasting results.

This book presents real skin stories with impressive before-and-after results made possible by GREEN PEEL®. Be inspired and discover the potential of GREEN PEEL®.

Originally, Christine Schrammek was researching for an anti-inflammatory and soothing skincare to be used after a GREEN PEEL® treatment. She developed the first tinted cream against blemishes – the original Blemish Balm.

1958

In the 50s, Christine Schrammek developed the original GREEN PEEL® Herbal Peeling, a natural method for exfoliation of the skin.

1967

1989

Together with her daughter, dermatologist and allergologist Dr. med. Christine Schrammek-Drusio, Christine Schrammek continuously further developed the GREEN PEEL® Herbal Peeling.

The history

Christine Schrammek inspired people all over the world with her presentations and demonstrations.

1999

The only herbal peeling to be awarded the Beauty Forum Readers' Choice Award - 1st place for the 3rd time!

- 2009/2010
- 2011/2012
- 2017

2017

Launch of GREEN PEEL® Energy Home Care Sets.

2022

2009

In the following years, the original GREEN PEEL® Herbal Peeling Classic was extended by 2 additional treatments to treat skin problems more individually.

GREEN PEEL

Benefits of GREEN PEEL®

GREEN PEEL® is a natural skin treatment developed over 60 years ago by Christine Schrammek to specifically treat a wide range of skin concerns. It offers a gentle and effective alternative to chemical peels and is performed in more than 70 countries by certified skin therapists and dermatologists.

- Natural ingredients to support skin regeneration
- Long-standing experience with proven results
- Continuous dermatological development by the two dermatologists Dr. med. Christine Schrammek-Drusio and Christina Drusio
- The right intensity for every skin need – from gentle to intensive

Areas of application

Impure skin:	Reduces blemishes and helps prevent new ones.
Scars:	Helps visibly reduce acne and other scars.
Wrinkles:	Stimulates collagen production – for smoother, more youthful skin.
Pigment spots:	Promotes a more even skin appearance.
Sun damage:	Regenerates damaged skin and improves the skin's appearance.
Stretch marks:	Helps stretch marks fade.
Hair loss:	Supports scalp health and reduces hair loss.

GREEN PEEL®
Classic

Regeneration and renewal with peeling effect

The most intensive treatment – ideal for deep wrinkles, severe impurities, or scars. A new skin in just 5 days.

GREEN PEEL®
Energy

The vitality and regeneration kick without peeling effect

Gentle peeling to refine the complexion and improve skin texture – without intensive peeling. Also ideal as a treatment course for recurring impurities, hyperpigmentation, or signs of skin aging.

GREEN PEEL®
Fresh Up

The freshness kick without peeling effect

The lifestyle treatment for intensive hydration and a radiant complexion. Also ideal for tired appearing skin, a pale complexion and the first fine lines.

GREEN PEEL®
Hair Boost

For hair loss and thinning hair without peeling effect

The innovative treatment option can be used for receding hairline, diffuse or localized hair loss, as well as thinning hair at the upper back of the head or hormonally and genetically induced hair loss.

The treatments

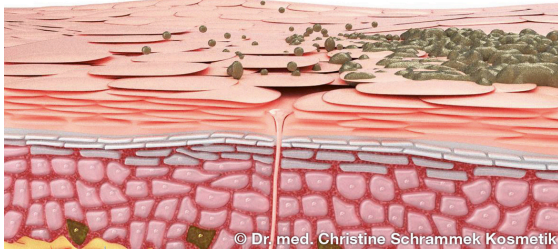

Skin condition/ skin problem	Classic	Energy	Fresh Up	Hair
Strong impurities	X	X		
Regular light to medium strong impurities		X	X	
Sudden impurities or skin reactions e.g., as a result of stress			X	
Large pores	X	X		
Visible deep wrinkles	X	X		
Fine wrinkles		X	X	
First signs of skin aging (pre-aging)		X	X	
Tired, pale skin		X	X	
Uneven skin	X	X	X	
Dryness wrinkles			X	
Pigment disorders	X*	X*	X*	
Flagged skin, loss of elasticity	X	X		
Scars	X	X		
Cornification disorders		X	X	
Keratosis pilaris		X	X	
Stretch marks (belly, upper arms, and thighs)	X**	X**		
Cellulite		X**		
Before and after liposuction		X**		
Receding hairline				X
Diffusely distributed hair loss				X
Localised hair loss				X
Thinning hair at upper back of head				X
Hormonal and genetically determined hair loss				X
Weak and thinning hair				X

With some skin problems, the treatments need to be performed several times or rather as a curative treatment. Hair problems should always be treated with at least a set of three treatments.

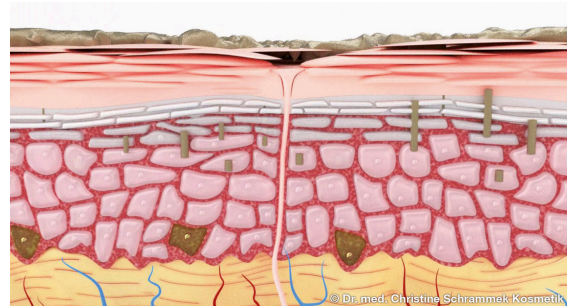

* optimal in combination with the Mela White products

** as cure in combination with the Body Science products

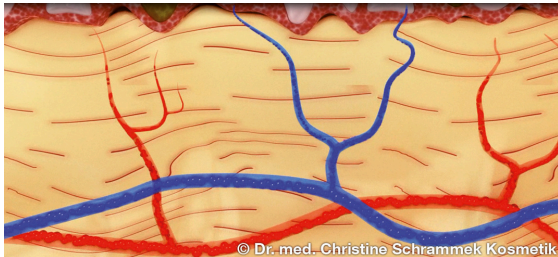

How the GREEN PEEL® herbs work in the skin:

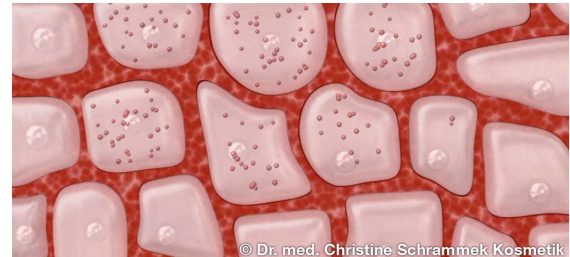

The herbal mixture is applied and massaged into the skin. This mixture consists exclusively of natural plant extracts and contains no aggressive substances or acids.

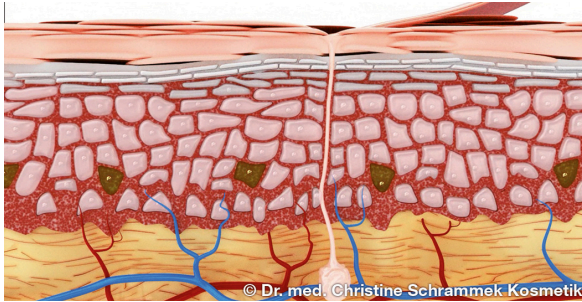

Micro-particles of the herbs penetrate into the upper layers of the skin. The duration and intensity of the massage depend on the skin type and structure.

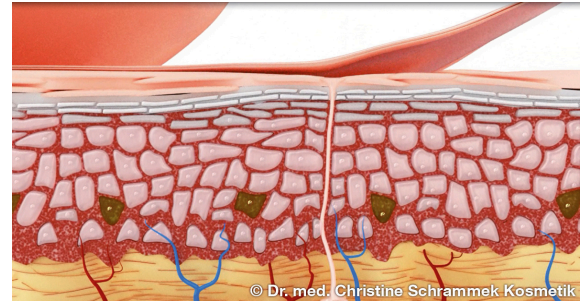

Plant ingredients initiate a series of reactions in the skin. First of all, circulation is increased.

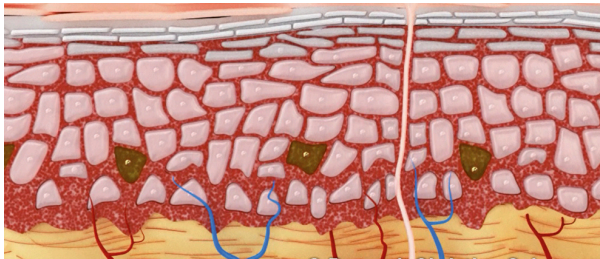

This results in a better supply of oxygen to the skin cells, activating their metabolism.

The intensive effect of the herbs accelerates the cells' natural regeneration process. Cell renewal is stimulated and new collagen fibres are formed.

The skin begins to peel visibly. Gradually, the top layers of the epidermis start to loosen while simultaneously pushing new, young cells to the skin's surface.

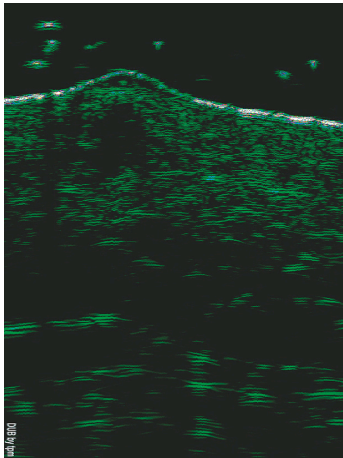

The skin's renewal process is complete after 5 days. Your 'old' skin is replaced with a new, fresh and clean skin. Normally, the skin needs about 28 days to renew itself. The GREEN PEEL® Classic treatment reduces this process to about 5 days.

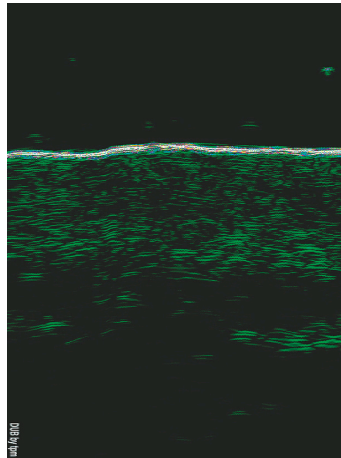

Visible results

Proven by modern ultrasound diagnostics. The original GREEN PEEL® herbal peeling treatment has stood for natural skin renewal at the highest level for decades. But how exactly does it affect the skin structure – and how visible are the results?

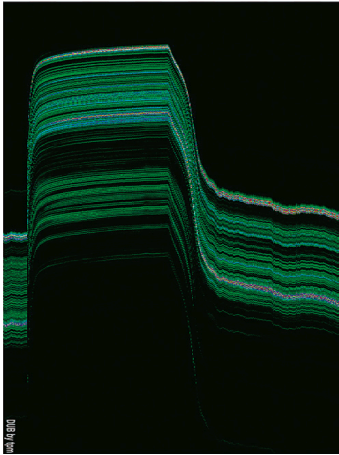

Using high-resolution ultrasound measurements, it was demonstrated: After just a few treatments, a significant improvement in skin density, structure, and elasticity becomes visible – documented through scientific imaging.

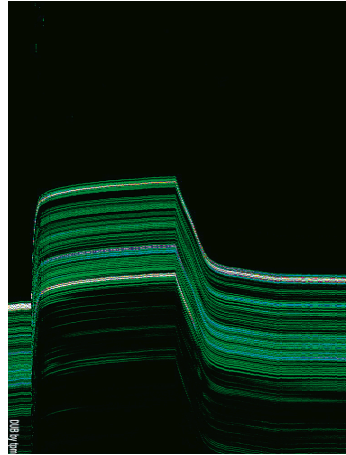

Before the treatment:
Impure skin

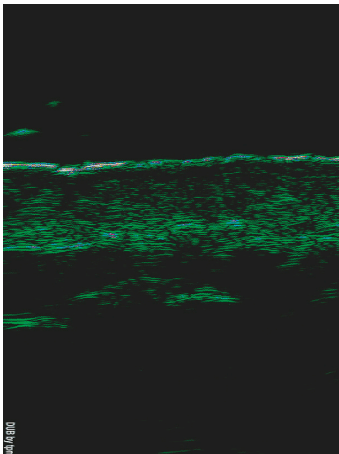

After the second treatment:
Normalisation of tissue

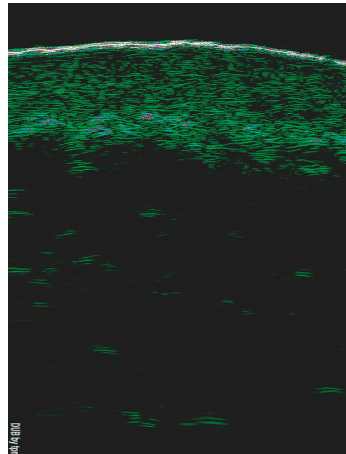

Before the first herbal peeling treatment:
High elasticity

After the first herbal peeling treatment:
Skin is less elastic. The tissue is firmer and tighter.

Before the treatment:
Aged, sun-damaged skin

After the third treatment:
Regeneration of tissue

Conclusion:

- Formation of new skin is stimulated.
- Elastosis is reduced. Thickness decreases while density increases.
- The entry echo increases. The skin relief is refined, and the skin surface appears smoother and more even.

Natural skin regeneration with and without peeling

How strongly your skin peels depends on your individual condition. But the degree of peeling has absolutely no influence on the effect of the GREEN PEEL® Herbal Peeling Classic. The herbs always provoke a renewal and regeneration process in the skin.

Real stories - real results

Natural beauty begins with healthy skin – GREEN PEEL® has been accompanying people worldwide on this journey for more than six decades. The method for natural skin renewal has been continuously further developed – yet one thing has remained the same: visible, impressive results for a wide variety of skin conditions. This book shows what GREEN PEEL® can achieve – from the first application to long-lasting skin transformation.

Collected from around the world

The cases presented come from institutes and clinics worldwide. They show how GREEN PEEL® works for a wide variety of skin concerns – on the face, the body, and even in cases of hair loss. Whether acne, wrinkles, scars, pigmentation disorders, or stretch marks – the power of the herbs works. GREEN PEEL® accompanies people on their journey to healthy-looking skin. This book aims to inspire, inform, and motivate.

Important notice:

This book is intended for trained beauticians and skin experts. It serves as professional information and further education within the scope of the professional application of the GREEN PEEL® method. The before-and-after images shown in this book document individual client results based on personal skin conditions, skin reactions, as well as the respective home care and application technique. Comparable results cannot be guaranteed. The results presented therefore do not constitute a promise of cure.

Home care

Individual home care

A key success factor is consistent home care:

With every Classic or Energy treatment, clients receive a home care set specially tailored to their skin type.

In this book, we also present additional products that we recommend individually for home care beyond the set – tailored to the skin condition and the treatment intensity. The combination of effective treatment and professional aftercare makes the difference.

Home care after GREEN PEEL® Classic

Coordinated skincare products for individual skin needs, available in different variants. For care after the treatment until the day of the Beauty Finish treatment on day 5.

Content: Herbal Care Lotion (50ml), Special Regulating/Special Care Cream (15 ml), Blemish Balm (in one of three shades in 15 ml) and Optimum Protection Cream with SPF30 to protect the skin in original size (75ml).

Home care after GREEN PEEL® Energy

Coordinated skincare products in mini sizes (cleanser, tonic, day care) for individual skin needs.

Homecare Set Hydrating - for dry skin

Homecare Set Regulating - for impure skin

Homecare Set Vitalizing - for demanding skin

Home care after GREEN PEEL® Fresh Up

To extend the treatment results, for example an ampoule treatment and/or a mask, tailored to the individual skin condition, are recommended.

Home care after GREEN PEEL® Hair Boost Treatment

For optimal treatment success, we recommend 3 treatments at intervals of 4 weeks, as well as the Hair Boost Tonic as specially tailored home care.

GREEN PEEL® with impure skin

Blemished skin is one of the most common skin concerns – often hormonally influenced, inflammatory, and distressing for those affected.

GREEN PEEL® addresses exactly this: with natural herbs, the skin is deeply cleansed, regulated, and regenerated. With GREEN PEEL®, strong results can be achieved for acne, congested skin, and enlarged pores – visible and long-lasting. Inflammation subsides, pores appear refined, and the complexion looks more balanced. Accompanying effects such as mild acne scars or dull skin texture are also positively influenced by the stimulated metabolism.

Depending on the intensity of the treatment – primarily with GREEN PEEL® Energy or Classic – the skin can visibly renew itself from within and regain its balance in the long term.

GREEN PEEL® is suitable for both young skin and adults with late-onset acne (acne tarda) or stress-related skin changes. The method impresses with its natural approach, high tolerance, and long-lasting effects – without chemical additives or invasive procedures.

GREEN PEEL® against wrinkles and skin aging

Naturally against the signs of aging

As the skin ages, it loses firmness, elasticity, and radiance. GREEN PEEL® offers an effective and natural solution for the visible improvement of wrinkles, loss of elasticity, and pigmentation disorders.

Regeneration from within

By specifically activating the skin's metabolism, stimulating blood circulation, and accelerating the cell renewal process, lines and wrinkles can be visibly reduced. The skin appears fresher, firmer, and more even – without invasive measures.

Homecare as a key element

In addition to the Homecare Set with a GREEN PEEL® Classic or Energy treatment, we also recommend further products that support the skin's regeneration – such as active ingredient concentrates, serums, or masks for demanding skin.

GREEN PEEL® against hyperpigmentation

Pigmentation disorders such as dark spots, melasma, or post-inflammatory hyperpigmentation can make the complexion appear uneven and older. GREEN PEEL® addresses this with a gentle yet highly effective regenerative stimulus – entirely without acids or aggressive substances.

Treatment with a system

Enhanced microcirculation and cell regeneration promote the breakdown of excess deposited pigment. The skin surface becomes more even, and pigmentation disorders are visibly reduced over time.

For pigmentation disorders, we recommend curative treatments – using deliberately lighter pressure combined with the derma.cosmetics Mela White range, specifically developed to gently brighten hyperpigmentation.

GREEN PEEL® for the body

Holistic skin improvement – from head to toe

GREEN PEEL® is no longer just a facial treatment. The method also delivers impressive results on the body – especially for stretch marks (striae), loss of firmness, keratosis pilaris, or after aesthetic procedures such as liposuction.

Targeted regeneration

The natural activation of skin functions through the herbal massage promotes blood circulation, firms the tissue, and stimulates cell renewal – exactly where the skin needs support. Especially for scars and stretch marks, the GREEN PEEL® Classic method helps to visibly smooth and refine the skin structure.

Care for long-term results

The GREEN PEEL® Homecare Set is also an essential part of post-treatment care for body treatments – tailored to the respective body area. In addition, we present products that provide targeted support beyond the set – for example for firming, pigmentation brightening, or keratinized skin.

GREEN PEEL® against scars

Scars are part of our story – but not always meant to be visible

Scars develop when the skin regenerates incompletely after injuries, inflammation, or procedures. The tissue is often dense, uneven, or discolored – and is frequently perceived as disturbing. GREEN PEEL® can provide gentle support here.

Skin renewal with system

The herbal massage stimulates blood circulation in the scar tissue, activates cell division, and specifically promotes skin renewal – allowing new, healthy cells to emerge. GREEN PEEL® Classic or Energy treatments are particularly suitable – individually tailored and performed in a series.

Typical scar indications for GREEN PEEL®:

- Atrophic scars: sunken, e.g. after acne or chickenpox
- Hypertrophic scars: raised, red, or thickened, but limited
- Post-traumatic scars: e.g. after injuries or burns
- Pigmented scars: visibly darker or lighter than the surrounding skin
- Post-operative scars: e.g. after cesarean section, liposuction, or surgical procedures

GREEN PEEL® Hair

New impulses for scalp & hair growth

Hair loss is a sensitive issue – for both women and men. The GREEN PEEL® Hair Boost Treatment was specially developed from a dermatological perspective to activate the scalp, stimulate microcirculation, and specifically counteract diffuse, hormonal, or locally caused hair loss.

Targeted effect through activation

The treatment begins with the specially developed Activating Scalp Massage. This special massage stimulates blood circulation in the scalp and optimally prepares it for the active ingredients that follow. The proven GREEN PEEL® herbs are then applied: they enhance the metabolism as well as the oxygen and nutrient supply to the scalp, stimulate the hair follicles, have a regenerating and strengthening effect, and leave the hair feeling soft and supple.

Tonics for daily care

For daily care between and after the treatments, we recommend our Hair Boost Tonic, which continues the effects of the treatment at home in a targeted way.

Additionally, the Hair series offers a gentle tonic for sensitive scalps as well as a revitalizing tonic that provides mature scalps and greying hair with new energy.
